

Please go to Fortis_GD_AdvancedTeam doc for definitions							
Assumptions	With current ability to regenerate lives, through time or teammates, or infinite-lives charms + the scarcity of other ressources, I assume that lives are NOT a main ressource for a simplified economy						
	+5 moves are only used once per level, max, to simplify the economy						
	When a player is about to lose, they have a 50% chance to use a +5 move						
	Each time a +5 move should be used, the player also uses 2 boosters to avoid losing						
	Player never uses its last ressources						
	With current nber of level per day, a player can finish Pinata and Dog without issues						
	Pinata and Dog have the same content						
	HC won by helping teammates is negligible						
Colors of values	This is an assumption (should be replaced by data asap)						
	This is an input (can be changed through configs)						
	This is a tuning value (used for rough economy, cannot be changed in config)						
	This is a calculation						
Additional comments	Win rates are assumptions but are also goals. Even if the Level Designer cannot change win rate through a config, "changing levels to reach target winrates" should be the focus of LDs. That's why WR are not purple but yellow						

Time per level (seconds)	120				
Time per day (seconds)	1800				
Sessions per day	2				
Time per session	900				
Level per day	15				
Win Rate Floor Value	0.45				
WR% per free move	4%				
WR% per booster	8%	<= 1 booster saves 2 moves			
Free Move value in HC	3				
levels HC base	10				
Hard levels HC base	100				
Very Hard levels HC base	150				
Flat +5 moves in HC	900	Remaining Moves from +5	2	Advanced +5 moves in HC	894

[illegible]
